

NICU Knowledge

Answering Questions, Easing Fears

NICUknowledge™ can be a tireless member of your NICU team.

It is available 24 hours a day in your NICU waiting room, ready to answer questions, explain procedures and sooth raw nerves. NICU parents desperately seek knowledge about what is happening, what are the doctors saying and what to expect.

NICUknowledge was prepared by a dedicated team of NICU nurses at a major teaching hospital to address the questions heard most often. It contains nearly 3 hours of videos and presentations, all delivered in a warm and sensitive manner.

Available in both floor and table models.

The floor model has a printer that can give them information to take home. The table model is easily moved to any place that is convenient to your or the families.

Grants and gifts can fund your NICUknowledge.

Grateful families or local grant sources often provide funds for programs like NICUknowledge. We can give you samples of well-written grant applications to make this process easier. We can even provide NICUknowledge to you for a small monthly fee under our Technology License program. Just call for details 800-232-3151.

We handle installation, maintenance and updates, so NICUknowledge is easy to implement.

Purchase or license plans come with complete equipment maintenance and content update support, so there are no unexpected fees or costs.

Request a FREE CD-ROM and view NICUknowledge on your own computer.

Call us at 800-232-3151 to request a free copy of NICUknowledge to view on your own PC. You will experience sample videos, hear the audio and view the breadth of content.
